

MINT MICROCANNULA™

Blunt Tip Microcannula
for atraumatic injections

MICRO CANNULA™

MINT Microcannula™ is a sterile, single use device intended for subcutaneous injection of liquids. It is a flexible, blunt tip cannula used to inject while causing minimal discomfort, pain, and bruising.

*Package: 50 units with accompanying punching needles in a box

ONE STOP GUIDE CANNULA™

MINT One Stop Guide Cannula™ is an “All-In-One Cannula” where the puncture needle and filler cannula are integrated. This innovative and unique feature offers easier insertion and reduces procedure time.

*Package: 50 units with accompanying punching needles in a box

Why is MINT Microcannula™ special? | MESO NEEDLE

Blunt tip creates less trauma and pain compared to needles for better comfort and recovery

The **bevel indicator** shows where the opening is to allow for control and precision after insertion

Scale markers for precise injection and flexible cannula for easier insertion and greater maneuverability around vessels and nerves

Ultra thin wall for smoother and easy insertion, ensuring minimal discomfort, pain, and bruising for your patients

MINT Meso Needle is designed for efficient and virtually painless injections. Ideal for mesotherapy, a minimally invasive treatment that uses microinjections to rejuvenate and tighten the skin.

*Package: 50 units in a box
