What is MINT™?

MINT is a lifting thread (facial tissue fixation thread) made of dissolvable material polydioxanone (PDO) with 360°, 3D helical barbs to pull and fixate skin tissue for wrinkle improvement.

It is a PDO(Polydioxanone) to deliver safe and outstanding results.

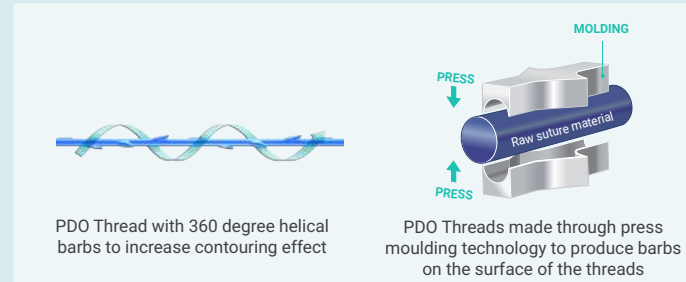

Developed under patented moulding pressed technology, the helically positioned 360°, 3D barbs have high tensile and anchoring strength to provide superior results.

Anchoring Strength
The patented, helical moulded barbs of MINT provides powerful anchoring strength

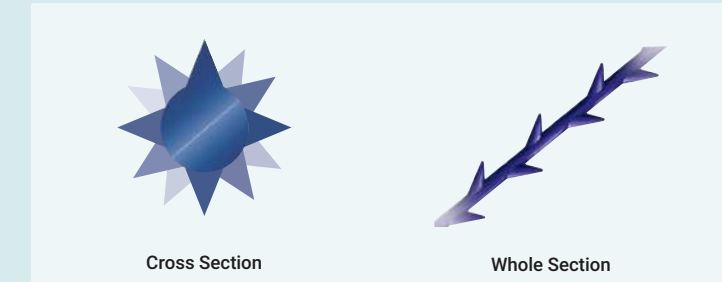

Tensile Property
MINT has high tensile property due to its uncompromised structural integrity from its unique moulding press technology

Patented Moulding Press Technology

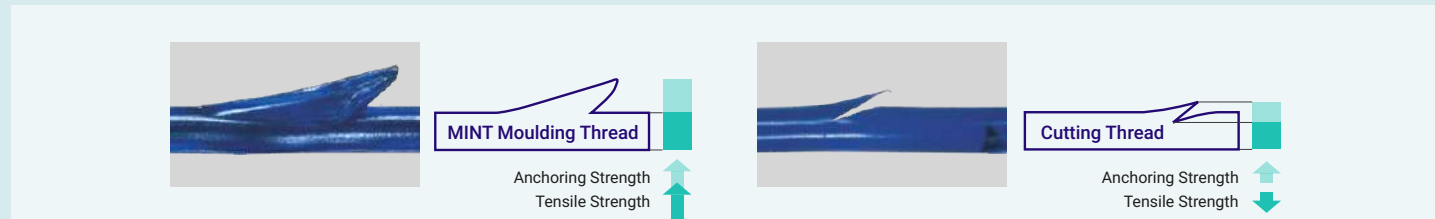

3D Moulded barbs provide maximum anchoring and tensile strength

360° Helically Moulded 3D Barbs

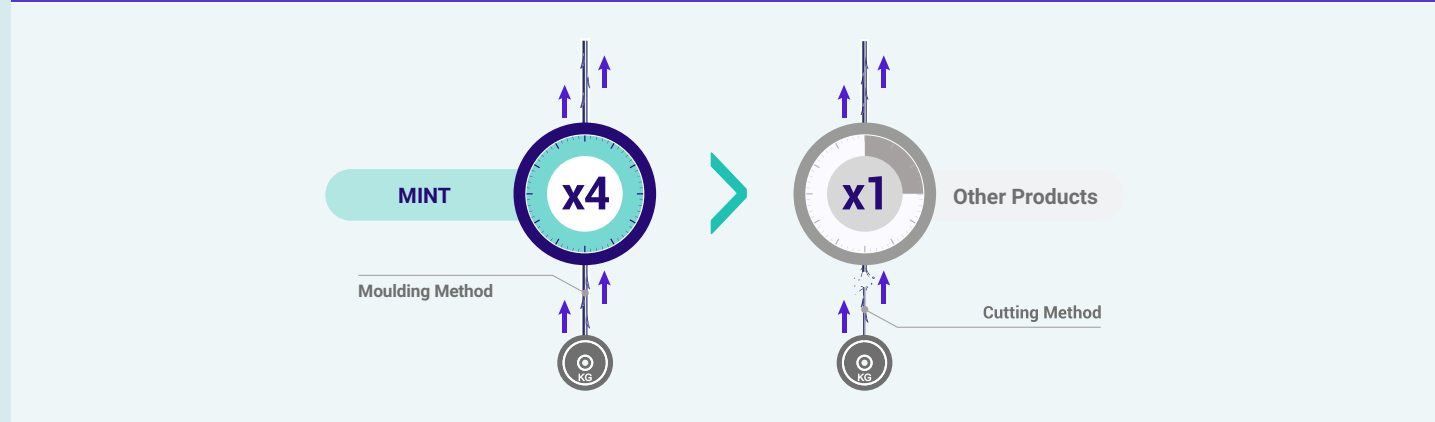

Helically moulded 3D barbs fix and support the skin tissue from all directions

Moulding Method

MINT is designed to increase tensile strength without damage to a thread

MINT is made of press moulding method which is 4 times stronger than cutting method

Global Patent Registration

MINT is a global brand with patents on manufacturing methods registered in 10 countries. It is a global brand with unique, unrivaled technological capabilities by securing patent registrations on the manufacturing method for each country.

Approval of PDO Thread For Facial Lifting

MINT is a product currently and continuously exported to the United Kingdom, EMEA, North America, South America, Asia, Oceania as a PDO thread for facial lifting.

MINT Achievements

Global lifting certifications and registrations acquired with international countries such as FDA, CE, and CFDA to assure excellent technological capabilities and reliable safety.

Europe CE Certification Acquisition

US FDA Registration

Korea MFDS Approval as facial tissue fixation thread

China CFDA Registration

Timeless Rejuvenation with MINT™ PDO

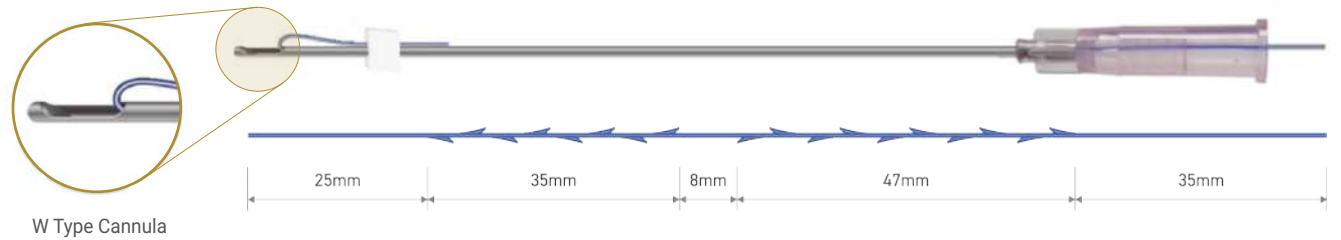

FINE

Cog Design: Bi-direction

Thread Length	Barbs Length	USP Size	Cannula Gauge	Package

mono

MINT mono is a smooth thread that stimulates facial tissue to produce collagen, which volumizes the skin.

*Package: 10pcs x 5 sterile bag 50pcs in a pouch

Needle Size (Gauge)	Needle Length (mm)	Thread Length (mm)	Thread Thickness (USP)
25G	40mm	50mm	5-0
	50mm	70mm	
	60mm	90mm	
	90mm	150mm	
26G	40mm	50mm	5-0
	50mm	70mm	
	60mm	90mm	
	90mm	150mm	
27G	40mm	50mm	

mono screw

MINT mono screw is a smooth thread that is coiled, which stimulates the surrounding soft tissue to effectively regenerate collagen for skin volumizing.

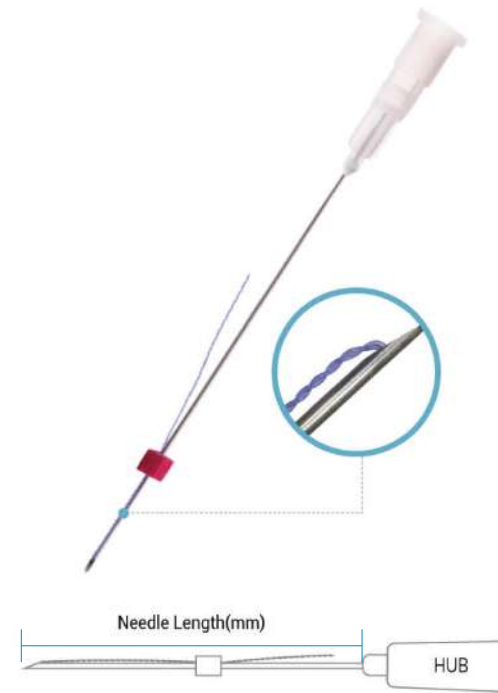

*Package: 10pcs x 5 sterile bag 50pcs in a pouch

Needle Size (Gauge)	Needle Length (mm)	Thread Length (mm)	Thread Thickness (USP)
27G	50mm	70mm	5-0
	60mm	90mm	
	25mm	30mm	
29G	40mm	50mm	6-0
	50mm	70mm	
	60mm	90mm	
30G	25mm	30mm	7-0
	40mm	50mm	
	50mm	70mm	

twin

MINT twin consists of two MINT mono threads that are twisted together. Its twist allows greater stimulation than a single smooth thread to synthesize collagen, which in turn results in more volume and skin rejuvenation.

*Package: 10pcs x 5 sterile bag 50pcs in a pouch

Needle Size (Gauge)	Needle Length (mm)	Thread Length (mm)	Thread Thickness (USP)
25G	40mm	50mm	6-0
	50mm	70mm	
	60mm	90mm	
	90mm	150mm	
26G	40mm	50mm	7-0
	50mm	70mm	

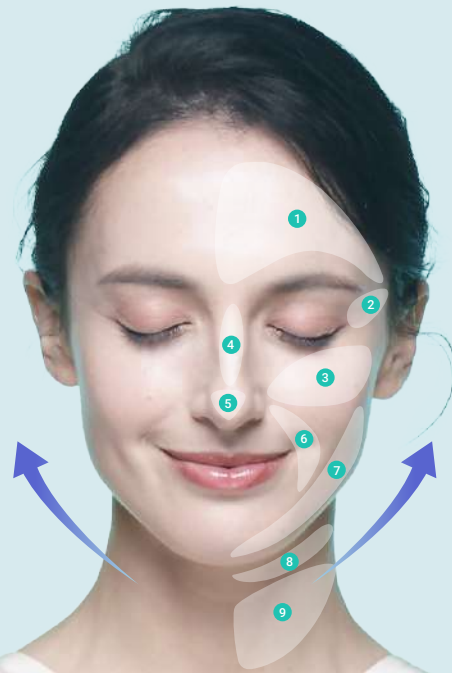

twin screw

MINT twin screw is comprised of twisting two MINT mono screw, which are already coiled. The two closely coiled threads stimulate more soft tissue, allowing greater collagen production and skin rejuvenation.

*Package: 10pcs x 5 sterile bag 50pcs in a pouch

Needle Size (Gauge)	Needle Length (mm)	Thread Length (mm)	Thread Thickness (USP)
26G	60mm	90mm	7-0
	90mm	150mm	
27G	40mm	50mm	7-0
	50mm	70mm	
	60mm	90mm	

WHICH AREAS CAN BE TARGETED?

MINT PDO threads are barbed and highly effective for

- 1 Sagging Forehead and Droopy Eyebrows
- 2 Sagging Eyelid or Cat Eye Look
- 3 Rejuvenating and Lifting Mid-face
- 4 Rhino Nose
- 5 Low or Blunt Nasal Tip
- 6 Softening The Nasolabial Folds
- 7 Sagging Jowls
- 8 Minimising Double Chin or Neck
- 9 Sagging and Wrinkled Neck
